1	Introduction	2
2	Requirements	2
3	Module installation	2
4	Configuration	3
5	Configure Address fields	4
6	Configure Address Customer Type	5

#### 1 Introduction

The Einvoice Prestashop Module allows you to add the pec email and SDI fields for E-Invoice in Customer Address.

Below you will find all the information you need to understand and use this module.

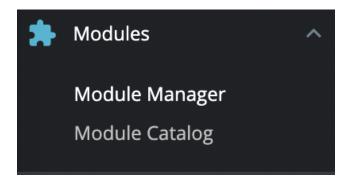

### 2 Requirements

The requirements needed to run the module on your system are:

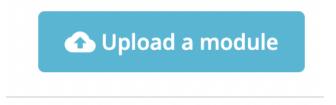

- PrestaShop version 1.7.8 or higher
- PHP 7.2 or higher

#### 3 Module installation

After you have downloaded the module you will have a compressed zip. Open the administration panel of your store and go to the Module -> Module manager menu.

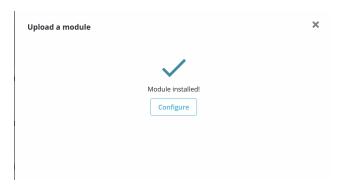

Click on the button located at the top right "Upload a module".

A panel will be opened where you can select the form file to be loaded. Click the "Choose a file" and select the zip file, exactly as downloaded from the store PrestaShop addons. Click on the button "Upload this module" and wait for the upload confirmation message.

After the installation is finished (it takes very little time) it will return the successful installation message.

NB: If you have problems with the above mentioned steps, you may want to contact technical support using the appropriate section available in PrestaShop addons site.

## 4 Configuration

The module is configured by clicking on the "Configure" button accessible from the list of modules.

Here you can configure which fields are mandatory to insert.

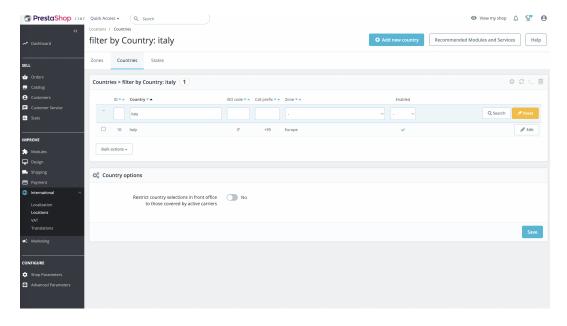

## 5 Configure Address fields

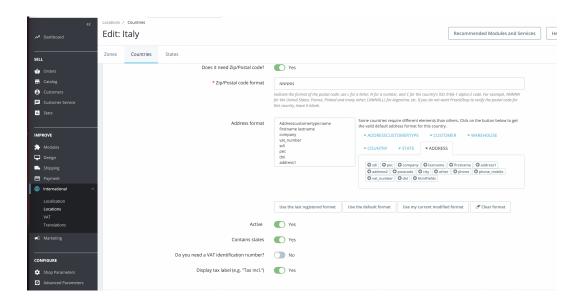

Before making the module operational, it will be necessary to insert the SDI, PEC and customer type fields between the fields of the customer address.

To do this, follow these steps:

 Open the "International -> Location" menu, search for the "Italy" country and click on the Modify button

 Then click on the "Address" panel and add the fields sdi, pec, Addresscustomertype:name in the position you want.

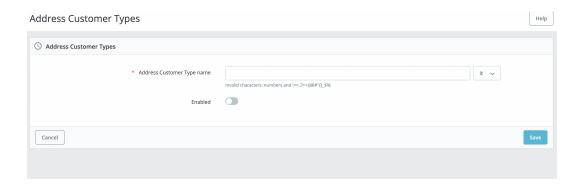

• Click "Save" to confirm the configuration.

# 6 Configure Address Customer Type

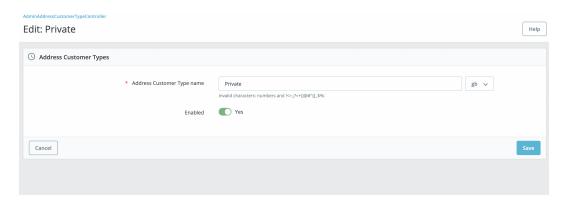

You can also add, edit or remove address customer type in "Shop Parameters -> Setting Address Customer Type" menu.

To add a new type you can click on "Add new address customer type" button and fill the form that is shown.

To edit a type you can click on edit icon and modify the information of chosen item.

To remove a type you can use the menu that appears on click on dotted menu. Warning: you can't remove the default types.
